NTNU

NTNU Vision 2060: June 2013- rector Gunnar Bovim asked

- *How can strategic campus development contribute to sustain and develop universities (and NTNU) as attractive places for learning and knowledge development in a future of increased competition in higher education and research*?

Why :

- need for more flexibility of space
- new learning environments
- a new digital world for education
- increased internationalization of higher education
- a more sustainable development

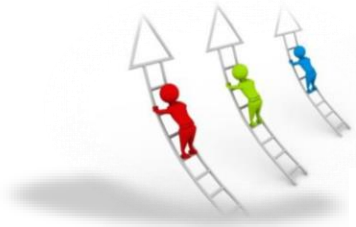
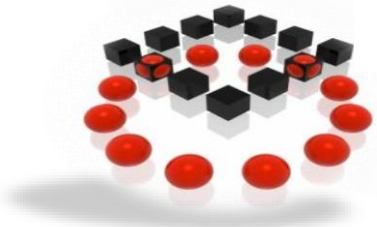
NTNU Four Senarios for Campus Development

Elite



Growth

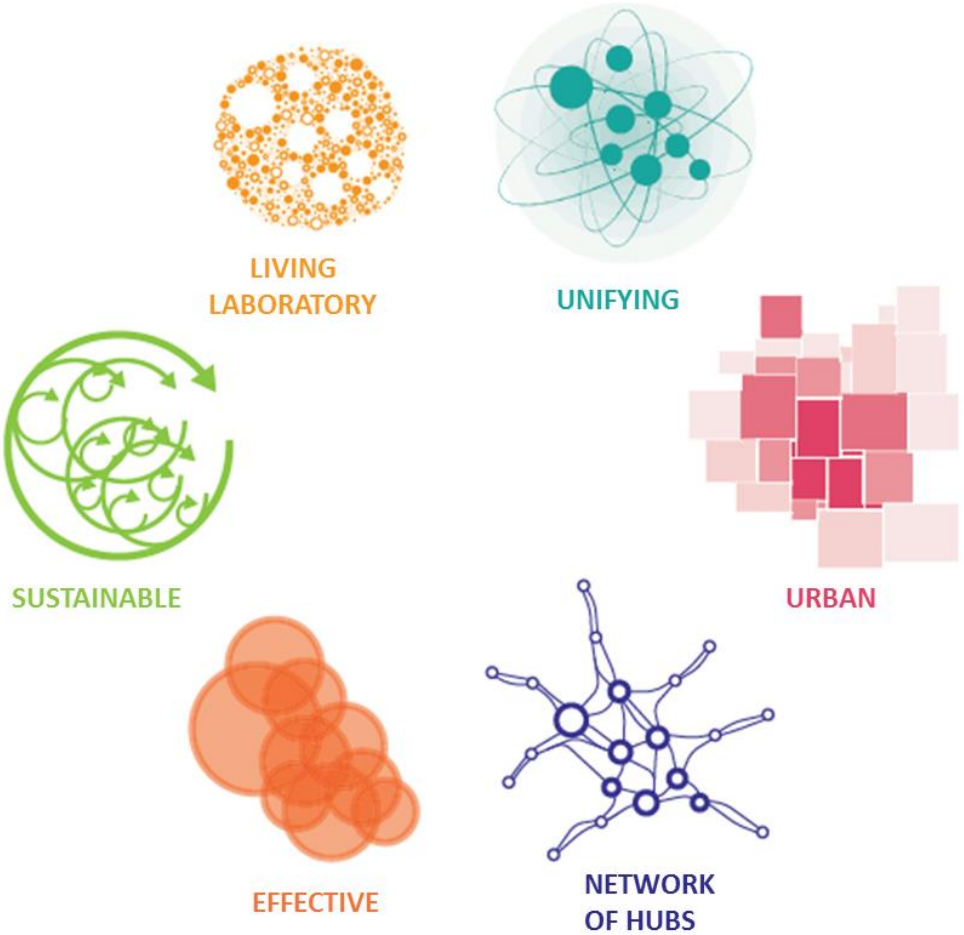


Digital

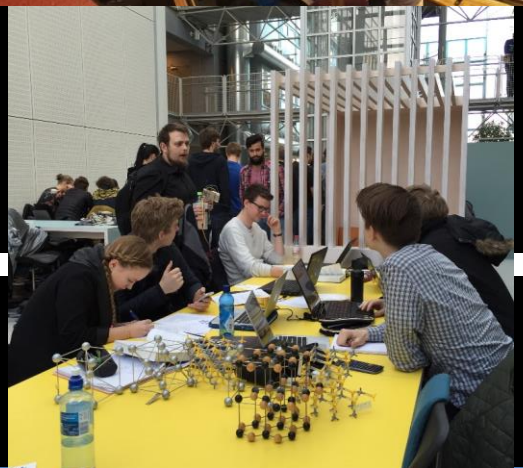
Urban

08.09.15: Government support to NTNU campus development.
Prime minister Erna Solberg

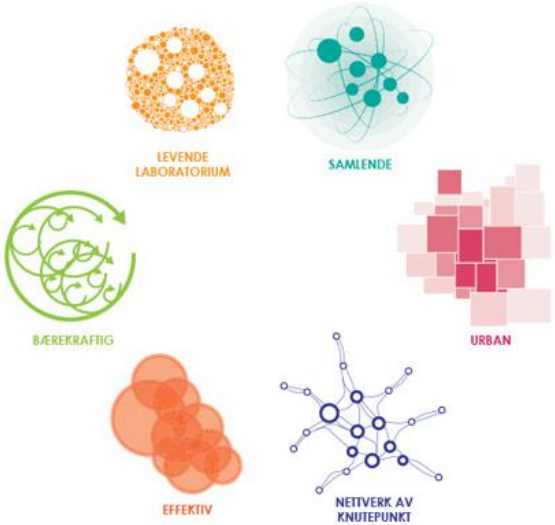
Six principles for qualities
we defined and want to achive when developing NTNUs campus for the future.



Pilots : new learning spaces



Main concept



Campus:

Open and inviting for everyone

Hubs:

One main central hub, at NTNU

Learning area:

Concentrated varied areas for multiple use

Workplaces:

Adaptable and flexible

Why ?

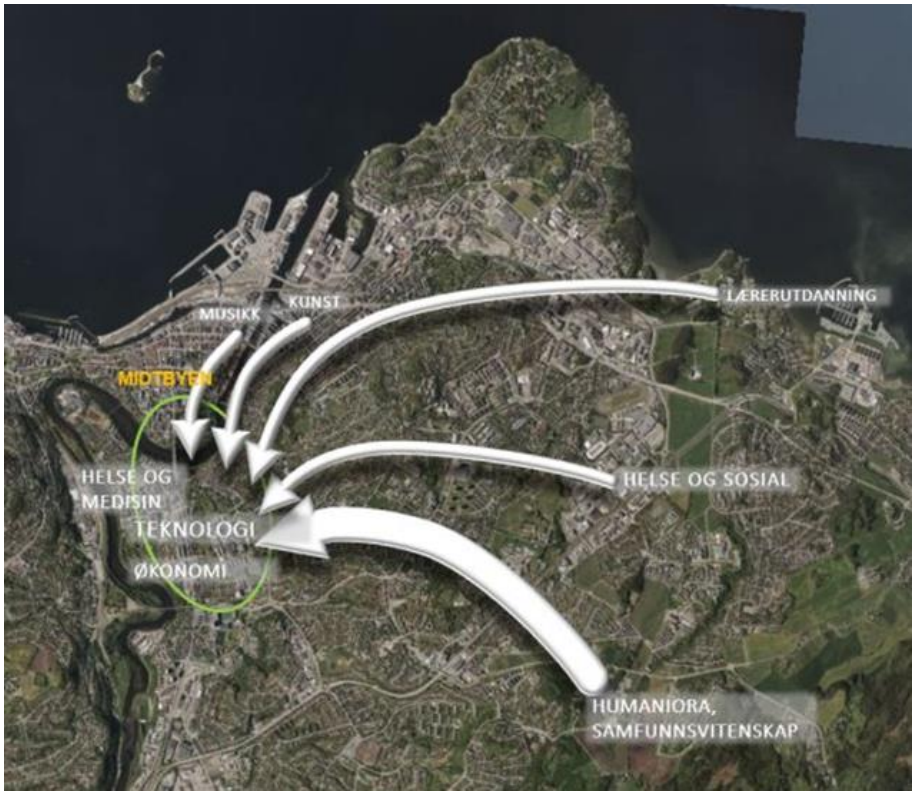
How ?

Government decision on new campus - 2019

Comprehensive and integrated project with interdisciplinary co-location of academic environments around Gløshaugen (and westwards)

- Estimated costs of around NOK nine billion
- Possible implementation over 10 years
- 92 000 square metres new buildings
- 45 000 square metres modernization

Rector Gunnar Bovim and the Minister of Research and Higher Education, Iselin Nybø



NTNU R@D program : The Campus of the future

- *Planned for two phases: 2020 – 2023 / 2024 – 2027*
- *Supporting PhDs, Post docs, Masters thesis and different projects*

4 major themes:

- **Project development, project management and (user) involvement, - possibly ownership / governance and whole life planning**
- **Space planning and management – workspaces for different users and activities**
- **Learning environments, new learning technologies and use of global platforms**
- **Organizational development and requirements needed to secure the goals for more interdisciplinarity and quality “**

Support for the program to be confirmed soon ---

Prime minister Erna Solberg, Minister Iseline Nybø, CEO Alexandra Gjørv, SINTEF and Rektor Anne Borg, NTNU

Glad for penger til campussamling og Ocean Space Centre !

Thank you !
